innovaphone – Defining Tomorrow's Workplace

communicate. connect. collaborate.

innovaphone offers a professional all-in-one solution for your business communication. Our solutions are scalable, secure and developed entirely in-house.

■ **Lean Solutions Right from the Start**
Our product portfolio is lean and requires no server. This is what makes our solutions so simple and what will simultaneously save resources.

■ **It's Your Decision**
All work and communications solutions by innovaphone are available either on premises or in the cloud.

■ **You Pick and Choose**
Smartphone? PC? Tablet? There is no need for you to adjust: our solutions are completely identical on all devices, no matter which one you are using. Therefore, your employees will meet the solutions with great acceptance.

■ **(Almost) Unrestricted Compatibility**
All innovaphone solutions fully conform to standards and therefore offer maximum interoperability.

■ **We Value our Independence**
innovaphone is self-financed to 100 %. What we focus on are the demands of our customers and not the moods of the market.

■ **Quality "Made in Germany"**
Our entire product portfolio is developed in-house by our engineers and software developers.

■ **Security is our Top Priority**
Maximum security and availability due to an operating system developed in-house combined with the integration of state-of-the-art security mechanisms.

innovaphone IP Telephony

Customers opting for the innovaphone PBX receive a professional IP telephone system that suits any company size and any business structure. Due to the unique modularity and the variety of functions, hardware platforms, end devices and software solutions, all individual requirements placed on the system will be fully met. The innovaphone PBX is designed as a stand-alone IP telephone system. Yet, its full performance is achieved when combined with the Unified Communications functionalities of the innovaphone myApps platform. The complete solution with all its full features is available either on premises or in the cloud.

Unified Communications
by innovaphone

Unified Communications by innovaphone

Gone are the days of "only making phone calls". Today, employees and business partners do not only reach for the handset but also make use of the most diverse ways to connect with each other and to exchange information. Therefore, an integrated communication structure is necessary.

■ Video, Presence, Chat, Office and Mobile Integration in addition to Application Sharing and Conferencing turn the innovaphone PBX into the mature yet still lean myApps all-in-one communication solution.

■ This complete solution with all its full features is available either on premises or in the cloud.

innovaphone myApps

innovaphone myApps, the universal work and communication platform, includes apps to communicate, work and administrate. All the important tools that are necessary to comfortably complete daily work tasks are available in one unified interface. myApps is a UC client – and much more: myApps is also a framework based entirely on web technology that functions like a mobile operating system. Irrespective of the device, the user interface of myApps is always identical. innovaphone myApps offers:

■ Quick and efficient communication with numerous communication apps - on any device.

■ Easy administration and configuration.

■ The framework to develop own apps with ready-to-use security mechanisms.
