PURE IP COMMUNICATIONS

innovaphone product information

innovaphone myPBX for Android:
IP phone client for Android smartphones

innovaphone myPBX for Android

Turn your smartphone into an innovaphone device with the myPBX for Android app! The combination of smartphone and myPBX app allows flexibility in all directions with the full functionality of an extension on the innovaphone IP PBX.

innovaphone myPBX for Android:
IP phone client for Android smartphones

With the myPBX for Android app, you turn your smartphone into an innovaphone device. Download it from the Google play store easily and free of charge. The app requires an innovaphone PBX and one myPBX license per client.

The combination of smartphone and myPBX app allows flexibility in all directions with the full functionality of an extension on the innovaphone IP PBX. Contacts from the central innovaphone PBX phone directory and contacts that are stored on the smartphone are always available. Set your own Presence whilst on the road to create more transparency in your team. In addition, all contact information, as well as detailed call lists for inbound and outbound calls are available. The smartphone's and the myPBX call lists are synchronized, thus all calls are shown both in myPBX and in the smartphone app.

In addition, for each call it is possible to select whether the contact should be called via the smartphone and GSM or via myPBX for Android and WLAN. This gives the user maximum flexibility to save costs and ensure availability. Special pre-settings mean automatisms are also available, which always select IP connections if WLAN is available or which prioritize GSM for external calls.
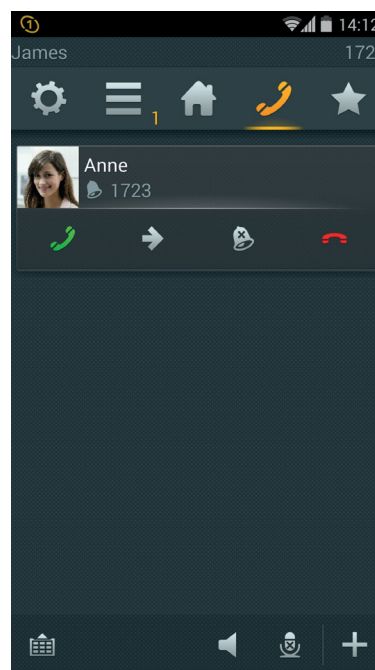

Features:
- One-number concept
- Access to all contacts on the central PBX and the smartphone
- Presence information from on the road
- Calls possible via GSM or myPBX and WLAN
- Detailed inbound and outbound call lists available
- Functionality is equivalent to the desk phones including secure RTP, H.323, DTLS
- Supported: Hands-free via wired and Bluetooth headsets
- Automatisms can be preset

Advantages:
- Flexibility in all directions
- All contacts always at hand
- Presence information ensures more transparency also on the road
- Easier integration of smartphones as a business phone
- Use all the benefits of a GSM mobile phone at the same time
- Cost saving due to possible calls via myPBX and WLAN

Licensing

The myPBX for Android app is available in the Google play store free of charge. Can only be used in connection with an innovaphone PBX. Requires one myPBX license per client in the innovaphone PBX.
