**CONNECT 2026**

Crisis-Proof Communication –  
Independent, Secure, Ready to Use

# We Could...

... show you some terrible images of disasters right now ...

But we are all familiar with floods, power outages, and disaster relief ...

Correct?

# Let's Talk About...

... Resilience – being prepared for emergencies

... Community – cross-agency communication

... Coolness – preparedness prevents panic

CONNECT 2026

Crisis-Proof Communication –  
Independent, Secure, Ready to Use

# Why Communication Matters

- Communication systems are part of the ISMS / **resilience** management
- BCM / **crisis management** must explicitly cover telephony and alerting (fallback, restart, drills)
- **Continuity of operations** is explicitly required.

# NIS2 Requirements for Critical Infrastructures

- “Appropriate and proportionate **technical**, operational and organizational **measures**”
- **Business Continuity Management**
  - Backups
  - Disaster Recovery
  - **Crisis management processes**
- **Encryption & authentication**

# Defining Crisis-Proof Communications

- Maintain established services
- Easy communication
- Sharing important information
- Clear understanding of tasks & procedures
- Always up to date

# iPP - innovaphone Portable Platform

## Sovereign European Solution

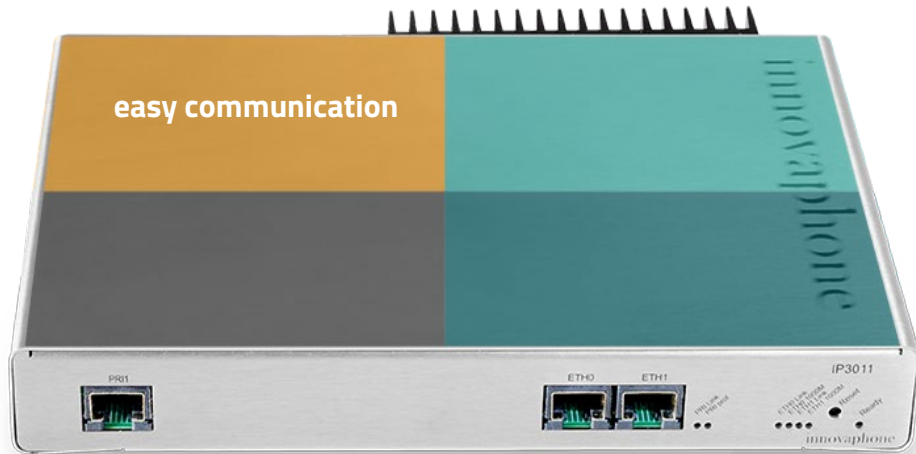

- Operation without depending on non-European cloud services
- Data sovereignty rests with the provider
- Operational even if the Internet is down

## Industrial-Grade Hardware: Mobile and Reliable

- Non-ventilated (no moving parts)
- Shock-resistant and transportable
- Suitable for mobile use, ranging from dispatch centers and crisis management teams to vehicles

# What Does It Mean to Be Crisis-Proof?

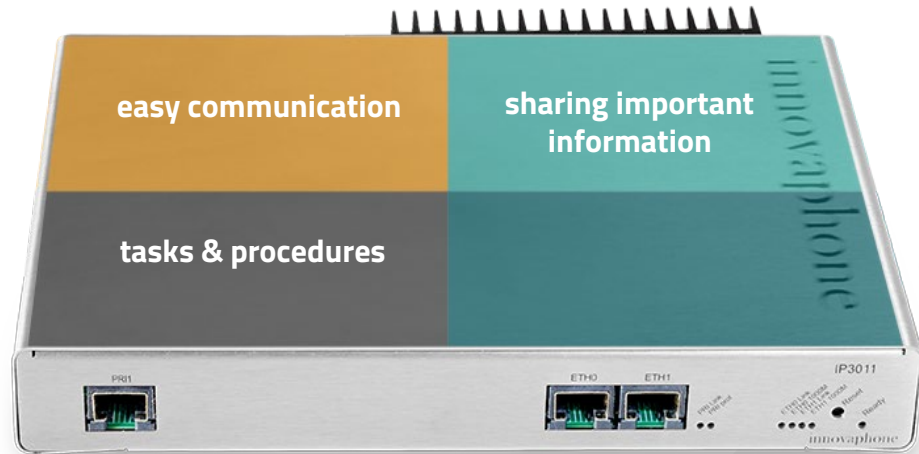

- Full-featured **IP telephony** supporting IP phones, softphones, and smartphones
- **Unified Communications & Collaboration**
- **Communication** via smartphones, browser and laptops / PCs
- **Connectivity** via standard SIP trunk, 5G modem, satellite and even via an analog line for voice-only calls

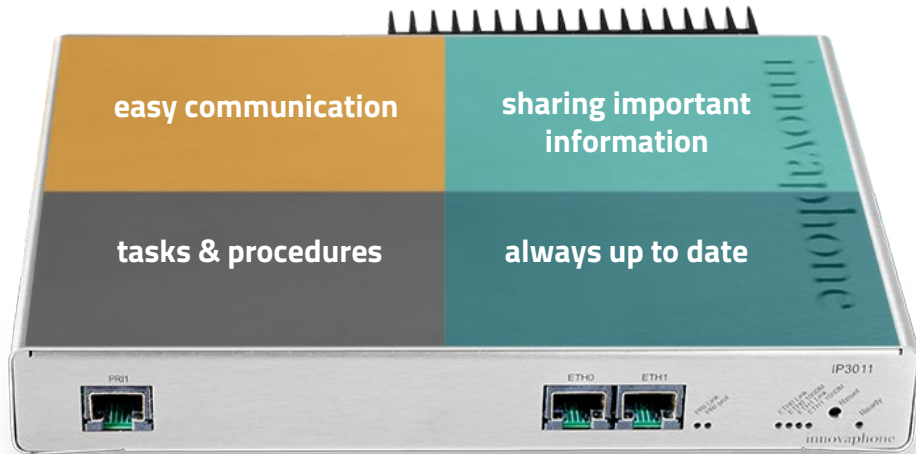

# What Does It Mean to Be Crisis-Proof?

- Information and interaction via the integrated social platform **Connect**
- Document storage via the **Documents App**
- **Projects App** for clearly defined tasks, transparent status information on open / completed projects and their tasks
- Status information shared across Projects and Connect

# What Does It Mean to Be Crisis-Proof?

- AI integration via the **Assistant App** (requirement: local LLM or IP connection)
- Automatic **transcriptions** of audio and video conferences
- **Contact management** always up to date
- Highlight: **Fax**

# iPP - innovaphone Portable Platform

## Minimal Power Consumption: Optional with UPS

- Very low power consumption (approx. 50–100 W + optional extras)
- Operation via a small UPS or portable power source
- Self-sufficiency during power outages can be ensured

## Ready to Use in Minutes

- Fully operational < 5 minutes
- Boot time < 1 minute
- Plug-and-play network integration

# iPP - innovaphone Portable Platform

IP270 phone with  
UCC interface

IP0013  
high-performance PBX / UCC platform

industrial switch  
Teltonika TSW202

satellite  
connectivity

extra drawer  
for documents

2U rack-mount drawer  
with DECT base station, handset, IP phone

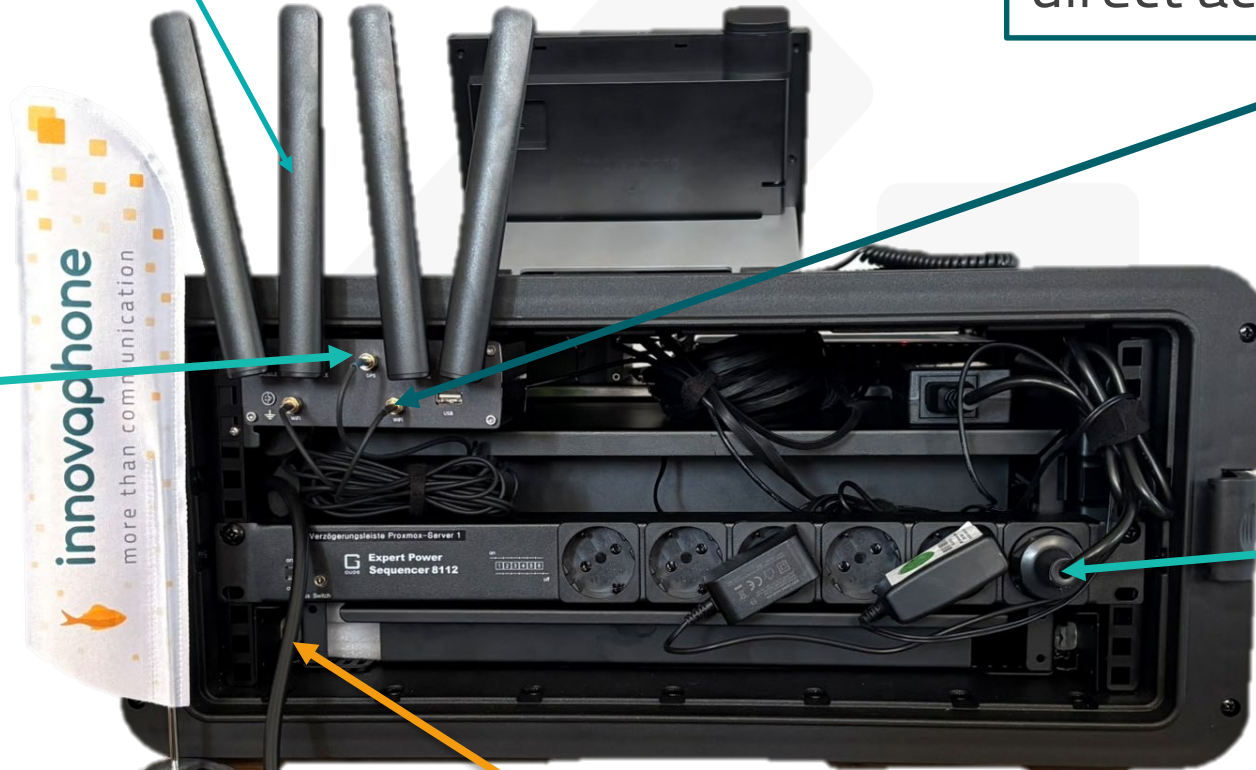

# iPP - innovaphone Portable Platform

5G router  
external antenna (optional)

Wi-Fi  
direct access for mobile devices

GPS antenna

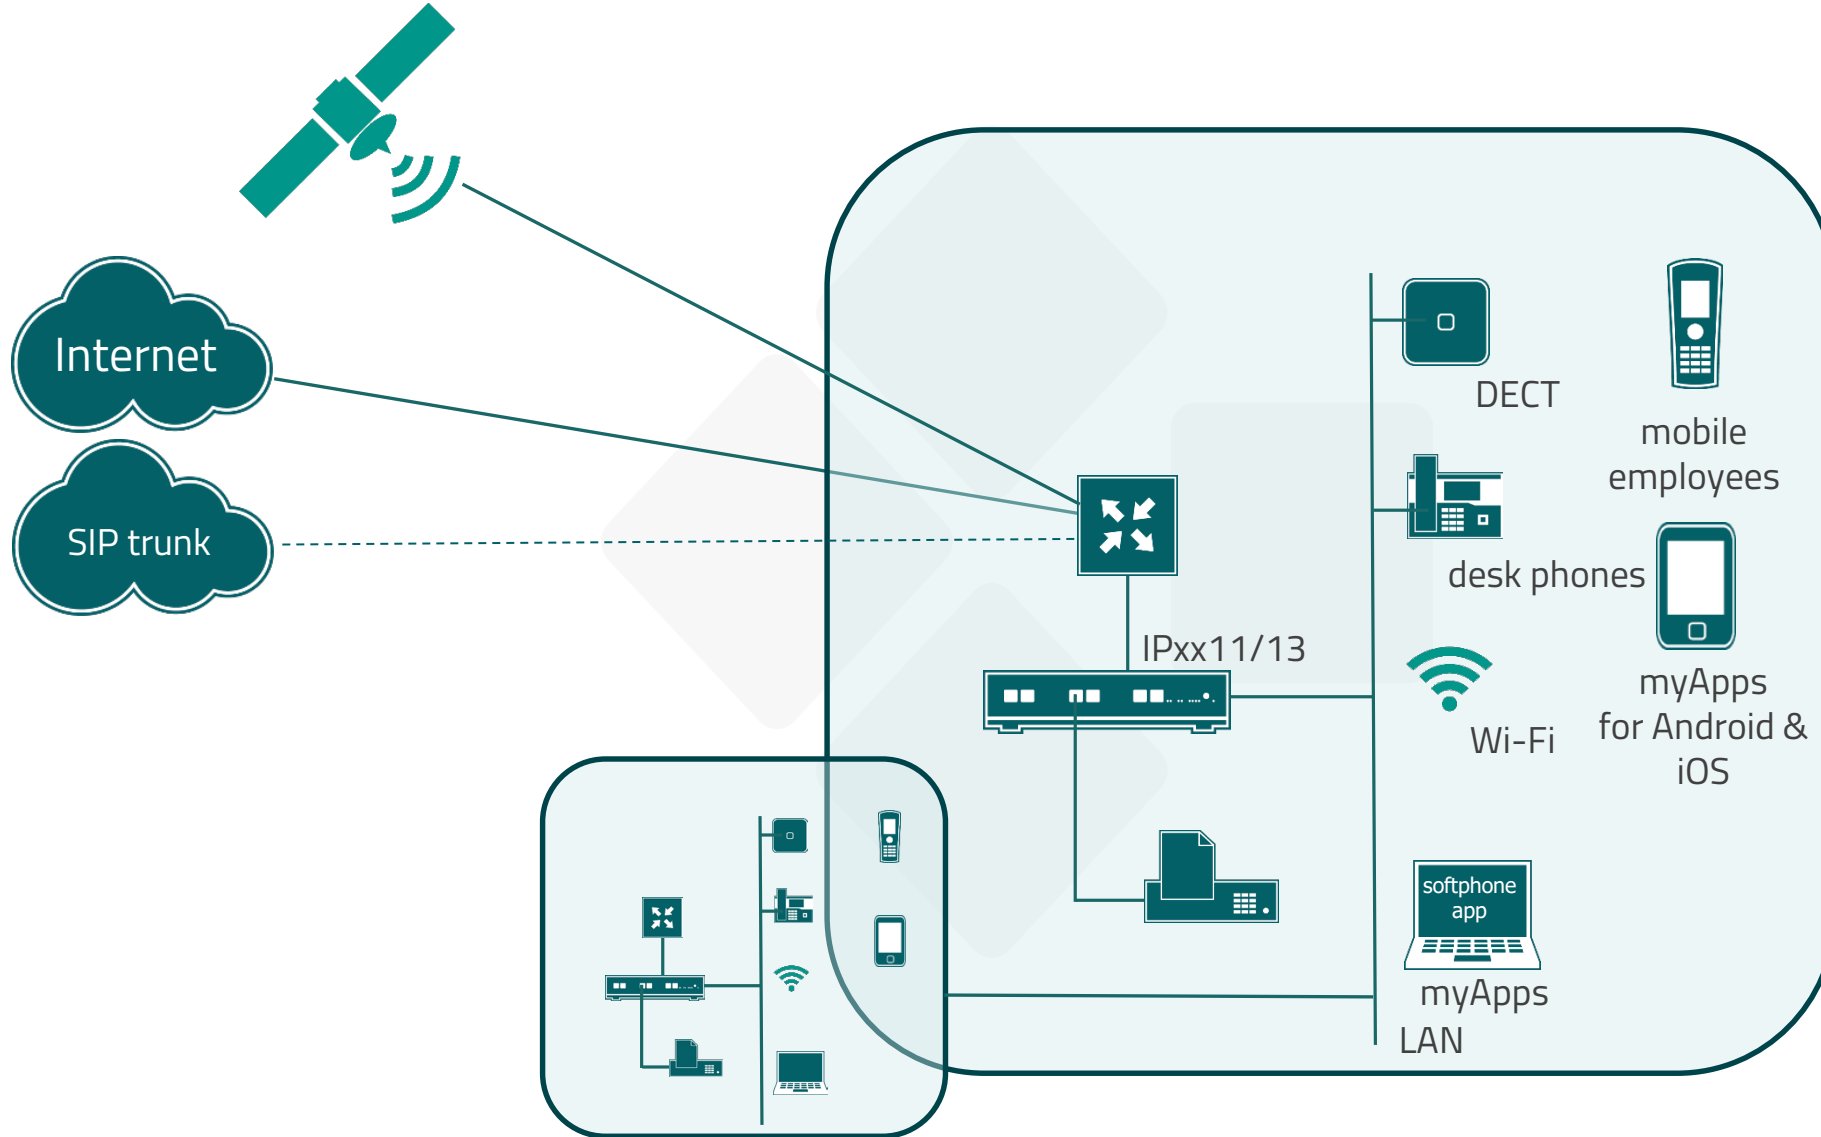

power strip

power cord / 230V

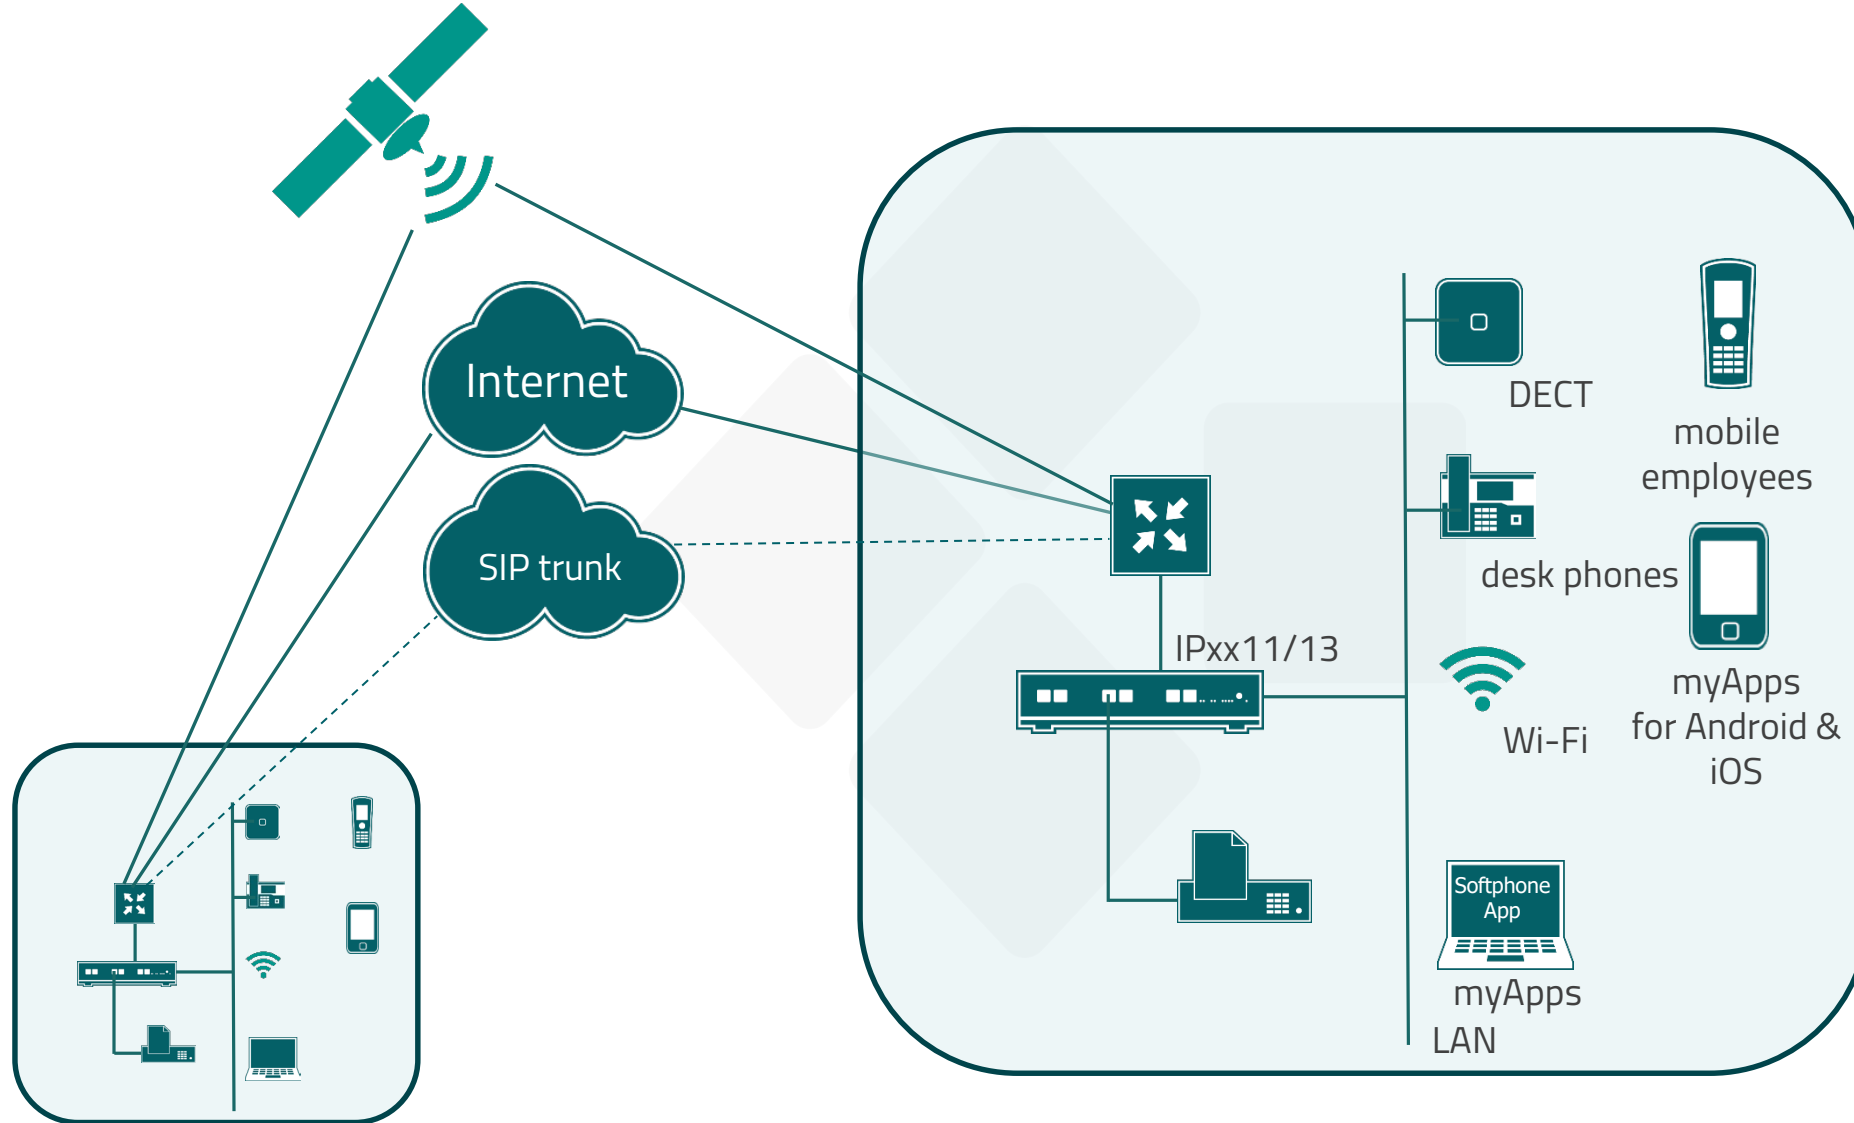

# Connecting to Public Networks

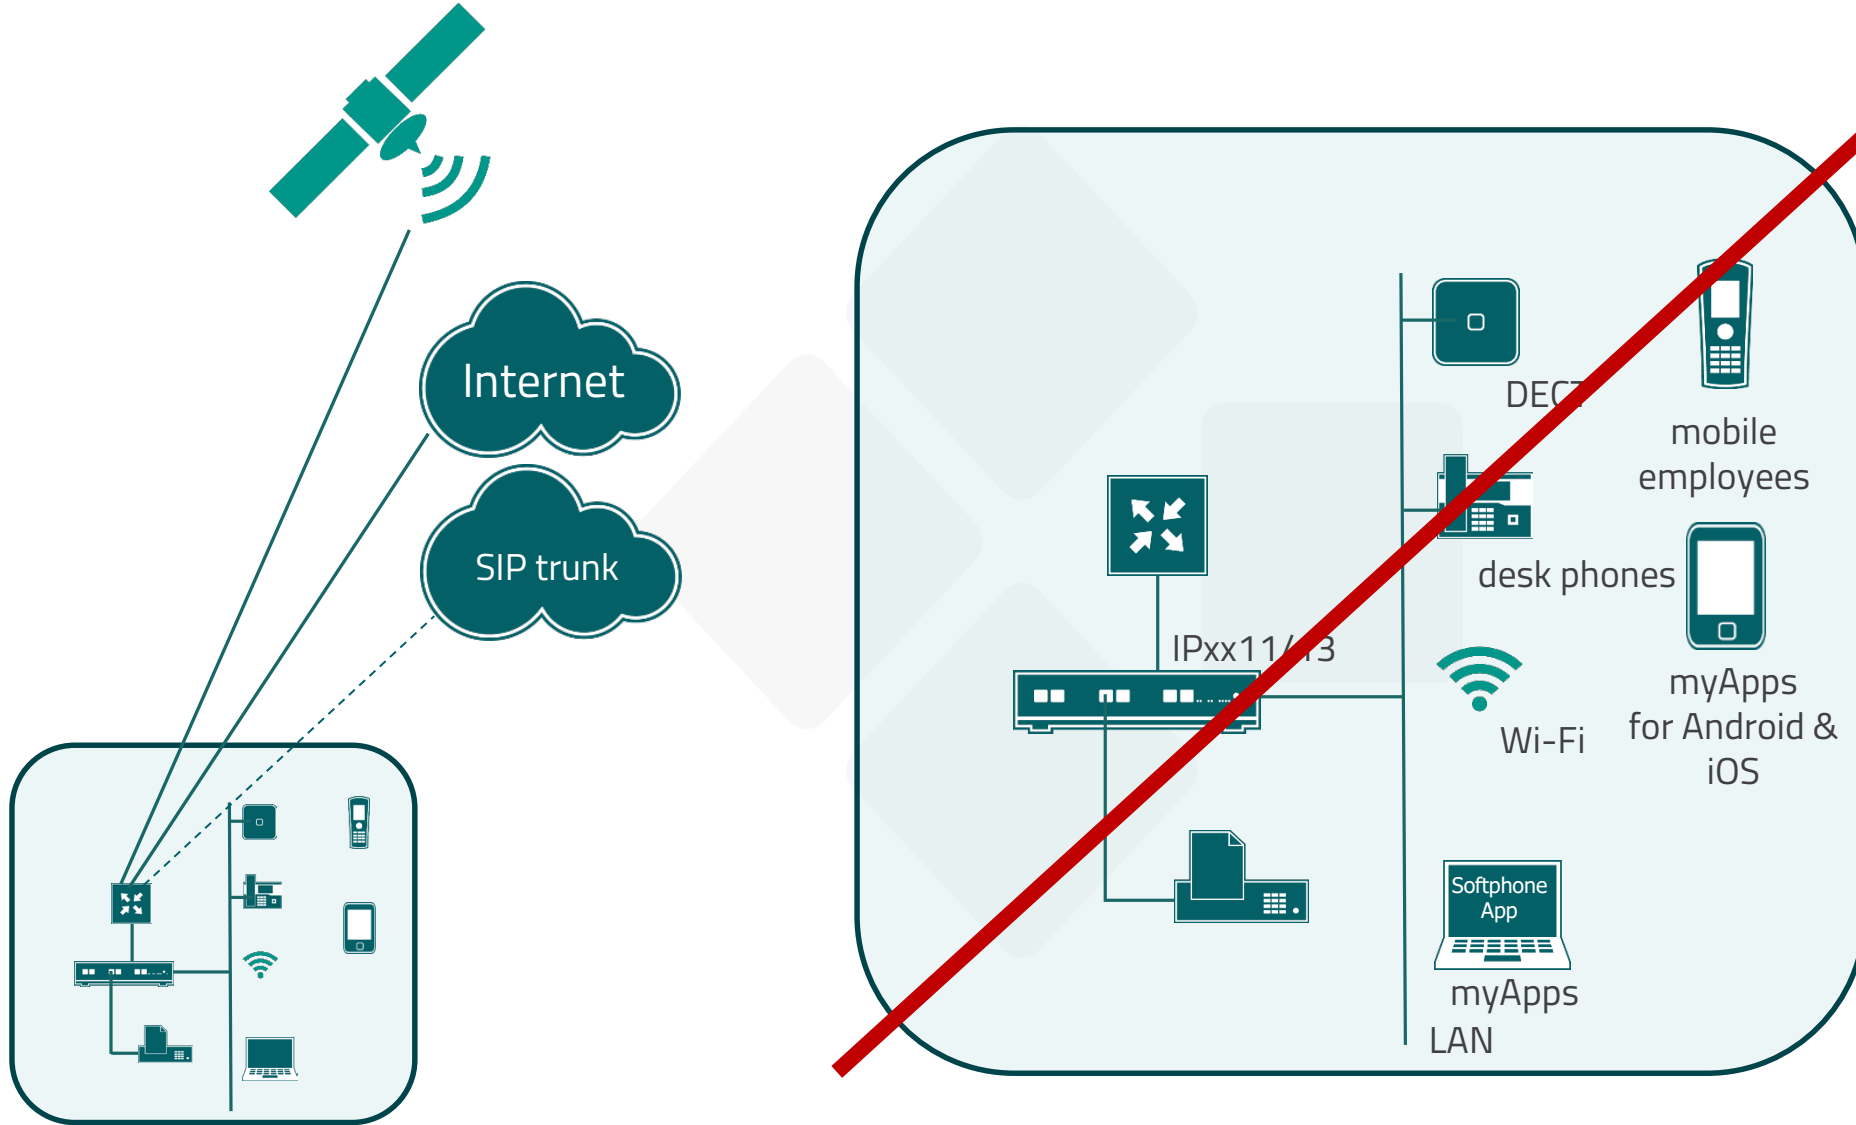

# Connecting to Public Networks

# Connecting to Public Networks

# iPP – What Do You Need?

## **I Already Have an innovaphone Solution:**

- Use the Slave functions
- UCC licenses
- Business apps such as Connect, Projects, Assistant
- Equipment such as router, switch, trolley, network access points, etc.

## **I Do Not Have an innovaphone Solution:**

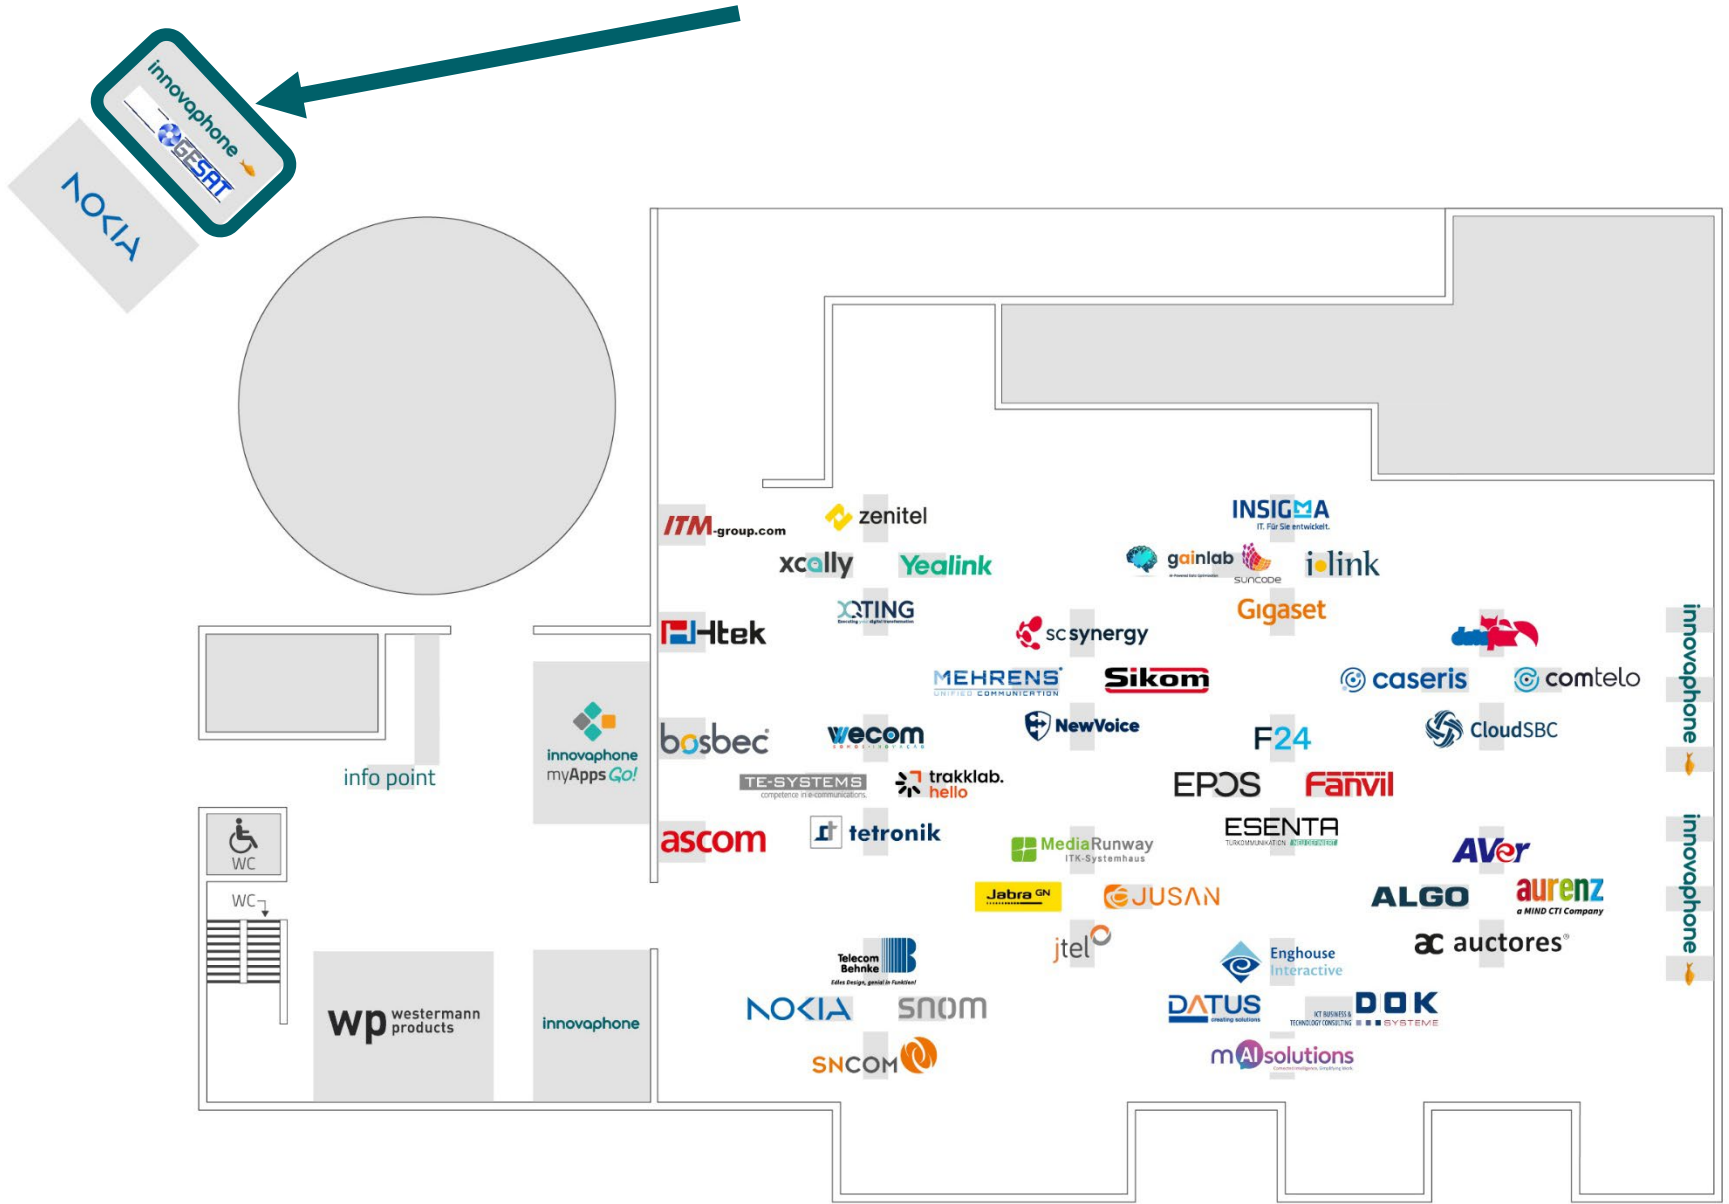

- Name, address, point of contact
- innovaphone port licenses
- UCC, business apps, etc.
- Equipment such as router, switch, trolley, network access points, etc.

**Either way, implementation is very easy!**
