

# innovaphone myApps @ School

innovaphone myApps can ideally be utilized as a high-performant digital school platform: User-friendly and accessible from any end device.

With myApps, it is easy to set up a digital study and learning environment which allows for the integration of versatile web applications.

## Advantages of innovaphone myApps as School and Educational Platform

- Phone system for the entire school (incl. teacher's rooms, kitchen, secretary's office etc.)
- Teachers and students access the same digital platform, regardless of the own network
- Easy integration of Moodle and other web-based eLearning platforms
- Accessible from any end device
- On-premises solution ensures that all data remain with the educational institution
- No fixed term, no hidden fees

Teaching staff receive their own phone extension. There is no need to share private phone numbers.

The Contact Widgets App is implemented on the school's website and enables virtual parent-teacher meetings with video calls. Availability and presence status of the staff can also be displayed, if desired.

Conference rooms and virtual classrooms can be provided either directly on the myApps platform, or existing platforms such as *Jitsi* or *BigBlueButton* can be integrated.

**The importance of data protection** – innovaphone Conferencing is based on the own innovaphone PBX of the customer. All innovaphone security mechanisms and protocols are therefore standardly included. Especially in educational settings, privacy and data protection are particularly relevant. Audio and video data of students receive the best protection possible.

innovaphone has been awarded the trust seals "IT Security made in Germany" & "IT Security made in Europe" from the German IT security association TeleTrust.

### Your Advantages at a Glance:

- Set up digital classrooms and virtual rooms for work groups
- Integrated video conferencing with whiteboards for interactive teaching
- Hybrid model: combine classroom teaching and remote teaching
