

Are you already All IP?

Not yet?

Then it is time to switch
to Voice over IP
with innovaphone!

The entire world is switching to All IP. Landline and mobile telephony, TV, Internet, as well as all associated services will, in future, run over the same network and communicate in a common language - Voice over IP. Thus, the legacy ISDN network will soon be a thing of the past, replaced by a modern and future-oriented technology – All IP.

Why has the time come to switch to Voice over IP with innovaphone?

:: Hassle-free transition

You can arm your telecommunications infrastructure for the All IP future and switch to IP with low investment costs simply by inserting an innovaphone VoIP gateway between the ISDN trunk and the traditional PBX. The special feature here: no additional license costs apply for the SIP interfaces today nor will they in the future.

:: Best investment protection

With the decision in favour of an innovaphone solution, you are making a sustainable investment in your telecommunications infrastructure. You are not only providing for the future, you can continue using existing equipment such as phones and faxes, as usual; and then you can gradually switch to the complete innovaphone Unified Communications solution according to your own choice and needs.

:: Latest features

The innovaphone communication solution offers completely new functionalities and versatile possibilities relating to IP telephony and unified communications. The UC components Video, Application Sharing, Office

Integration, Mobility, Fax or Voicemail contribute significantly to facilitate communication between teams and employees and to optimize processes.

:: Voice as IT application

In recent years, Voice has evolved to become an IT application - surely also in your company. Speak to us, your IT experts, and learn how you can benefit from the wide range of added values of voice-data integration in your company.

With innovaphone, switching to All IP is not an inconvenient requirement, but a forward-looking decision in favour of a smart and powerful Pure IP communication solution that will soon provide benefits for you.
